

## Contents

<b>On the issues associated with applying traditional Lagrangian mechanics to the material point method</b>	
William M. Coombs, Charles E. Augarde, Andrew J. Brennan, Michael J. Brown, Tim J. Charlton, Jonathan A. Knappett, Yousef Ghaffari Motlagh, Lei Wang.....	1
<b>Second-order convected particle domain interpolation (CPDI2) with triangular grid elements and triangular particle domains</b>	
Vibhav Bisht, Rodrigo Salgado.....	7
<b>LDFEM analysis of pore water pressure development in cohesive soil due to FDP auger Drilling</b>	
Jakub Konkol, Lech Bałachowski.....	12
<b>Centrifuge model test on deformation and failure behavior of soil slope overlying bedrock under coupled loading conditions</b>	
Liqu Ma, Yiyang Zhao, Wenzhong Yuan, Lilie Yang, Dexiu He, Changhui Ma, Ga Zhang.....	17
<b>Consistent Particle Method simulation of wave impact with air entrapment</b>	
Min Luo.....	22
<b>An improved moving least squares method for the Material Point Method</b>	
Quoc-Anh Tran, Martin Berzins, Wojciech Sołowski .....	27
<b>Moving least squares reconstruction for B-spline Material Point Method</b>	
Quoc-Anh Tran, Elizaveta Wobbes, Wojciech Sołowski, Matthias Möller, Cornelis Vuik .....	35
<b>Application of gas-water SPH method in low-head stepped spillway flow</b>	
Xing Wang, Shenglong Gu.....	42
<b>Numerical Simulation of hydraulic jump in stilling basin based on SPH method</b>	
Yunyun Zhang, Liqun Ren , Shenglong Gu.....	53
<b>Implementation of non-trivial boundary conditions in MPM for geotechnical applications</b>	
G. Remmerswaal, M. Bolognin, P.J. Vardon, M.A. Hicks, A. Rohe.....	61
<b>Application of particle-element coupled method to numerical forecasting of pneumatic caisson installation</b>	
Takatoshi Kiriya, Donghee Ko, Kazuo Endo, Yosuke Higo.....	68
<b>Soil-structure interaction simulation of landslides impacting a structure using an implicit material point method</b>	
Bodhinanda Chandra, Antonia Larese, Ilaria Iaconeta, Riccardo Rossi, Roland Wüchner.....	72
<b>Numerical simulation of water level surge based on sediment mass algorithm</b>	
Xiaogang Zheng, Ridong Chen, Xingnian Liu .....	79
<b>Modelling liquefaction using the Material Point Method – an evaluation using two constitutive</b>	

<b>models</b>	
Shreyas Giridharan, Dieter Stolle, Christian Moormann.....	82
<b>Application of Geo-contact to pile installation using the CPDI variant of Material Point Method (MPM)</b>	
Sujith Gowda, Christian Moormann, Dieter Stolle.....	90
<b>On implementation aspects of implicit MPM for 3D analysis</b>	
Lei Wang, Michael Cortis, William Coombs, Charles Augard, Michael Brown, Jonathan Knappett, Andrew Brennan, Craig Davidson, David Richards, Anthony Blake.....	97
<b>Combined LEM and MPM analyses for the simulation of a fast moving landslide in Hong Kong</b>	
Sabatino Cuomo, Angela Di Perna, Pooyan Ghasemi, Mario Martinelli, Michele Calvello...	103
<b>MPM-analysis of landslide propagation observed in flume test</b>	
Pooyan Ghasemi, Sabatino Cuomo, Angela Di Perna, Mario Martinelli, Michele Calvello..	109
<b>Numerical investigations on bearing capacity analyses of shallow foundations in small and large deformation</b>	
Marc Stapelfeldt, Alexander Chmelnizkij, Jürgen Grabe.....	115
<b>Multiscale investigation of suffusion with coupled CFD-DEM - Influence of different drag force models</b>	
Manuela Kanitz, Jürgen Grabe.....	122
<b>MPM Simulation of fine particle migration process within unsaturated soils</b>	
Xiaoqin Lei, Wojciech Solowski .....	129
<b>On stress oscillation in MPM simulations involving one or two phases</b>	
J. L. González Acosta, X. Zheng, P. J. Vardon, M. A. Hicks, F. Pisanò.....	135
<b>Modelling large deflection of a poroelastic beam with an implicit iteratively coupled material point method</b>	
Hilde Aas Nøst, Gustav Grimstad.....	140
<b>Calibration of hypoplastic parameters using an MPM model of a CPT</b>	
Michele Calvello, Pooyan Ghasemi, Mario Martinelli, Vahid Galavi, Sabatino Cuomo.	146
<b>Continuum modelling of the granular flows in gaseous states using material point method</b>	
Seyedmohammadjavad Seyedan, Wojciech Tomasz Sołowski.....	153
<b>Efficient multigrid based solvers for B-spline MPM</b>	
Roel Tielen, Matthias Möller , Kees Vuik.....	161
<b>The need for experimental studies on breaching flow slides</b>	
Said Alhaddad, Robert Jan Labeur, Wim Uijtewaal.....	166
<b>Comparison between Material Point Method and meshfree schemes derived from optimal transportation theory</b>	
Elizaveta Wobbes, Roel Tielen, Matthias Moller , Cornelis Vuik , Vahid Galavi.....	173
<b>A staggered grid material point method for efficiently eliminating grid crossing noise</b>	

Yong Liang, Xiong Zhang.....	179
<b>Comparison of solutions for cavity expansion in cohesive frictional soils</b>	
Hongyu Qin, Erwin Oh .....	180
<b>Saturated sand column collapse in air: comparison between MPM and coupled DEM-LBM</b>	
Francesca Ceccato, Alessandro Leonardi, Veronica Girardi, Paolo Simonini, Marina Pirulli...186	
<b>Constitutive modelling of phase transition in granular materials</b>	
Irene Redaelli, Pietro Marveggio , Claudio Di Prisco.....	194
<b>Geometric and material non-linear wave propagation with the material point method</b>	
Bruno Zuada Coelho, Alexander Chmelnizkij, Jürgen Grabe.....	201
<b>2D numerical simulation of turbulent flow inside the soil by LBM</b>	
T. Kitao, Y. Fukumoto, K. Fujisawa, A. Murakami.....	208
<b>Numerical simulation of dynamic compaction in Abaqus/CEL and MPM</b>	
Alexander Chmelnizkij, Sparsha Nagula, Jürgen Grabe.....	215
<b>1D wave propagation in saturated soils: verification of two-phase MPM</b>	
Alexander Chmelnizkij, Francesca, Ceccato, Jürgen Grabe, Paolo Simonini.....	221
<b>A question of scaling in immersed granular collapses</b>	
G.C. Yang, L. Jing, C.Y. Kwok, Y.D. Sobral.....	229
<b>Liquefaction-induced large displacements of acaisson quay wall: Barcelona Harbor, Spain</b>	
Gaia Di Carluccio, Núria M. Pinyol, Eduardo E. Alonso.....	234
<b>Thermal and strain rate effects on landslide. A real case</b>	
Núria Mercè Pinyol, Mauricio Alvarado , Eduardo E. Alonso.....	240
<b>Thermal effects in shear bands</b>	
Mauricio Alvarado, Núria M. Pinyol, Eduardo E. Alonso.....	245
<b>Numerical simulation of a free fall penetrometer deployment using the Material Point Method</b>	
Luis Zambrano-Cruzatty, Alba Yerro. ....	250
<b>Nested manifold MPM simulations for modeling fluid-driven fracture propagation</b>	
Chad C. Hammerquist, Yamina Aimene.....	257
<b>Scalable and modular material point method for large-scale simulations</b>	
Krishna Kumar, Jeffrey Salmond, Shyamini Kularathna, Christopher Wilkes, Ezra Tjung, Giovanna Biscontin, Kenichi Soga.....	262
<b>Effects of three gorges dam on poyang lake in respect of hydrodynamics</b>	
Saiyu Yuan, Chenyu Jiang, Hongwu Tang, Yang Xiao, Hao Cao.....	268
<b>Modelling of debris flow impact on slit dams by discrete element method</b>	
S.X. Gong, T. Zhao.....	273
<b>Simulation of seepage and overtopping induced dam failures</b>	
Dongfang Liang, Xuanyu Zhao, Alexander Rohe.....	278

<b>Influence of the physical properties of river sediments on the proliferation of <i>Chlorella vulgaris</i></b>	
Lile He, Yongcan Chen, Xuefei Wu, Jing Liu.....	284
<b>Image detection method for cracks in hydraulic tunnel lining in water conservancy projects</b>	
Jie Pang, Hua Zhang, Linjing Li, Shiwen Xu, Jishuang Huang, Xuefei Wu.....	289
<b>Direct Numerical Simulations on local scour around bridge pier with advanced Immersed Boundary Method</b>	
Jin Xu, Lingling Wang, Hai Zhu.....	294
<b>Chassis design of inspection robots for safety assessment in hydraulic tunnels</b>	
Ruoxuan Lan, Junjun Zhang, Hua Zhang, Xuefei Wu.....	299
<b>The Material Point Method for geotechnical engineering: A review for practical applications</b>	
Elliot James Fern.....	305
<b>Coupled modeling of bank erosion in the Upper Jingjiang Reach, China</b>	
Shanshan Deng, Junqiang Xia, Meirong Zhou, Jie Li, Yonghui Zhu.....	313
<b>MPM simulation of uplift behaviour of piles with enlarged bases in a sand foundation</b>	
Yong-Sen Yang, Liu-Chao Qiu, Lei Tian, Jing-Jun Li, Yu Han.....	319
<b>A Study of collapse in slopes using MPM and NLA (Numerical Limit Analysis)</b>	
Fabricio Fernández, Eurípedes Vargas Jr, Raquel Quadros Velloso.....	323
<b>Influence of building layout on dissolved pollutant transport over impervious surfaces</b>	
Taotao Zhang, Yang Xiao.....	331
<b>One-dimensional numerical modelling of channel evolution in the Jingjiang Reach of the Middle Yangtze River, China</b>	
Meirong Zhou, Junqiang Xia, Shanshan Deng, Fenfen Lin.....	336
<b>Cylindrical cavity expansion in Mohr-Coulomb soil under anisotropic stress field</b>	
Xuzhen He, L. Fernando Patino-Ramirez, Chloé F. Arson, Wei Wu.....	342
<b>A large-scale parallelised material point method system</b>	
Youkou Dong, Lin Mu, Dong Wang.....	350
<b>A coupled CFD-DEM framework to model submerged granular flow</b>	
Thien Q. Phan, Ha H. Bui, Giang D. Nguyen, Abdelmalek Bouazza.....	355
<b>Measuring topography and surface flow field with a drone</b>	
Cheng Chen, Jing Yan, Zhonglu Lin.....	361
<b>A comparative study of radial point interpolation method with finite element method</b>	
Bin Wang, Jianguo Li, Quan Jiang, Xia-Ting Feng.....	366
<b>SPH study of water wave interaction with solid/porous boundaries</b>	
Chiaki Tsurudome, Yuma Shimizu, Dongfang Liang, Abbas Khayyer, Hitoshi Gotoh.....	374
